Hi Phyllis, this one is different now. They are asking about our SOMP program for controlled substances in the DCs. We are rolling out the new one in the next couple of months, but several existing deficits could be a point of contention. The main deficit is that we don't have an automated process to identify and stop a suspicious order before shipping. This is corrected in the new system. George, (along with one of our attorneys), will be speaking to the DEA this week per their request. Thanks, Jim

The DEA agents have left DC 6028. They informed the GM – Dena McClamroch that they would be in touch to schedule a final debriefing which will likely include their supervisor. Anticipate the final DEA visit to take place within the next two weeks. All requested documents and information listed below was provided during the visit.

The agents seemed particularly interested in the corporate SOM program. Additional questions and details were asked about this program which required the need to provide a contact at the Home Office. Redacted-Privilege

**Redacted-Privilege**

In addition to the contact information the DEA asked for invoicing information for the following store numbers 1798, 5028, 6412 & 1548.

Let me know if you have any questions regarding the visit that I have not covered. Thanks
